

STI RF-1 SINGLE STATION LIQUID FILLER

The STI RF-1 filler is a flexible, semi-automatic system that is capable of filling liquids into Syringes, Capsules, Cartridges, Disposable Pens, Bottles or Suppositories.

Features

- Fill weight tolerances +/- 1.5% with free flowing liquids and +/- 3% with viscous products
- Heated systems available
- Multiple capacity pressure vessel options available
- Hand or foot pedal operation

Process Description

The product is forced from the 316L Stainless Steel pressure vessel into the product line and then dispensed through the needle valve into the selected container.

Support

- Engineering, CAD design and Customization of Systems
- Fast delivery of Change and Replacement parts
- On-site Field Service and Training
- Toll-Free Technical Support

Specifications

Dimensions (work area)

330mm (13in) x 356mm (14in.) x 915mm (36in)

Electrical Requirements

110-230 volts, single phase, 60 Hz / Current 2.5mA

Air Requirements

85 psi @ approx. 1cfm flow

Weight (without pressure vessel)

Approx. 4.54 kg (10lbs.)
